

Nahda University in Beni Suef (NUB) is located in Upper Egypt. It was established in 2006. It is a private university run by the Thebes Education Group

Nahda University in Beni Suef (NUB) was established at the center of East New Beni Suef City, just up the Cairo-Beni Suef road. The moment it was perceived how much attention education needs, especially in Upper Egypt, is the same moment NUB realized that its dream to build the institution was attainable. A university is a place to nurture youth and prepare educated generations to whom we can entrust the development of our beloved homeland. Adopting the most advanced education methodologies to build open-minded generations who can compete in different labour markets, NUB truly presents a model to be emulated.

NUB offers diversified studies that cover the most important technical, academic, and specialized work sectors. Its academic staff comprises eminent scholars who implement up-to-date scientific and academic education methods that enable students to fully comprehend their subjects and apply their lessons effectively at work
