

Medical University of Bialystok

The Medical University of Bialystok is a modern, rapidly growing public university, with a mission to provide the best possible education for professional, responsible, leading-edge medical staff; to carry out scientific research at the most advanced level worldwide; to implement innovative solutions in cooperation with medical service providers; and to respond to social needs.

The Medical University of Bialystok is a precursor and leader of pioneering work on artificial intelligence in medicine, and a contributor to large-scale research on genomics, proteomics, metabolomics, radiomics and bioinformatics.

The University pioneers in the field of advanced banking of biological material from patients with lifestyle diseases. The collected data are fed to the Polish HD Medicine Database, designed as a source of in-depth understanding of the mechanisms of such diseases as cancer, cardiovascular diseases, metabolic diseases and more, and as groundwork for development of new therapeutic applications.
